

SEALING RUBBERS + CENTERING BELLS

Centering Bells

Centering bells, also known as backing plates, help maintain bottle stability and prevent misalignment, minimizing the risk of spills, jams, or product damage.

Sealing Rubbers

Sealing rubbers act as a barrier between the bottle closure and the contents, creating an airtight and leak-proof seal. This prevents oxygen ingress, preserves carbonation, maintains freshness, and helps ensure accurate fill heights.

When upgrading or expanding bottling lines it is essential to work with equipment manufacturers or suppliers who provide centering bells and or sealing rubbers designed specifically for your equipment, ensuring compatibility and optimal performance. FBN's in-house engineers will work with you to provide exactly what you need. Call us today to get started!

But Wait—There's More to Love About FBN!

TONS OF FILLER PARTS + WORLD-CLASS SERVICE

We provide replacement parts for your entire machine. From rotary unions to slide rods, bushings, and beyond, all parts are designed and machined in our state-of-the-art facility in Michigan. Plus we have a world-class service team to handle any project—from a simple rebuild to full machine overhauls, as well as troubleshooting and new package start-up support.
